PCI Film Directors Award for "Artistic Innovation" in Argentine Films in All Competitions - Debuts and Second Fovies

ERRANTE: La conquista del hogar by Adriana Lestido

JURY STATEMENT:

In this age of humanity where immediacy and the ephemeral reign, this film proposes a return to an essential action of the human being: contemplation. Observing and inhabiting the environment of a place as inhospitable and magical as the North Pole, where the artist dares to offer an ancestral journey into our own interior. With the enormous courage to recover the origins not only of being, but also of the cinematographic experience so that it may continue to occur in a movie theater.
